o_wild wrote on Wed, 24 August 2011 05:42Hi,
When I build MediaPlayer project with gcc, message shows:

I have already installed libav-0.7 and libSDL-1.2.14-10.fc14.
How to solve this problem?
Thanks.
Hello o_wild

In file MediaFile.h, line 198 there is
AVAudioConvert *reformat_ctx;
Is it there where you get the error?
