Subject: GridCtrl: master - detail Posted by forlano on Sat, 03 Sep 2011 08:46:28 GMT View Forum Message <> Reply to Message

Hello,

is there a similar functionality in GridCtrl?

If not, are there snippet code able to simulate it?

I guess they should be in HomeBudget but the code look complex and I can't find what it is real useful. So some better localization of this part of code would be great.

Thanks, Luigi
