This very slow. I recomend use Regular Expression (package plugins/pcr)

CSV-parser (regex pattern below)

$$\wedge((\text{"(?:[^"]|\"")*"}|[\wedge,]*)((\text{"(?:[^"]|\"")*"}|[\wedge,]*))*)\$$$

or

And in other words:

<http://www.google.com/search?client=ubuntu&channel=fs&am p;q=retrieving+CVS+regular+expression&ie=utf-8&oe=utf-8>
