Hi Friends,
I am trying to add data from a EditField to Sqlite3 Database through the following statement..
SQL * Insert(Grid)(Data,Edit.GetData());

the schema file is..
grid.sch

```
TABLE_(GRID)
  STRING_ (DATA,20)
  INT_ (R1)
  INT_ (R2)
  INT_ (R3)
 END_TABLE
```

But data is not getting into database file...
Is this SQL statement correct or it needs correction...??
