Hi Friends,

I am trying to add data from a EditField to Sqlite3 Database through the following statement..

```
SQL * Insert(Grid)(Data,Edit.GetData());
```

the schema file is..

grid.sch

```
TABLE_(GRID)
  STRING_(DATA,20)
  INT_(R1)
  INT_(R2)
  INT_(R3)
END_TABLE
```

But data is not getting into database file...

Is this SQL statement correct or it needs correction...??
