Monty.mvh wrote on Tue, 06 September 2011 08:21Hi Friends,  
I am trying to add data from a EditField to Sqlite3 Database through the following statement..  
SQL \* Insert(Grid)(Data,Edit.GetData());

the schema file is..  
grid.sch

```
TABLE_(GRID)
  STRING_ (DATA,20)
  INT_ (R1)
  INT_ (R2)
  INT_ (R3)
END_TABLE
```

But data is not getting into database file...  
Is this SQL statement correct or it needs correction...??

```
SQL * Insert(GRID)(DATA, Edit.GetData());
```
