Hi,

I have two tables Master and Slave.
I should access value of KEY_1 generated in Master table in slave table.. How to achieve this..?
I tried with the statement
SQL & Insert(SLAVE) (KEY_1,'Select (KEY_1) .From(MASTER)');
and i got some junk value than the required ..
Is the above Statement correct..??

table1.sch:

```
TABLE_ ( MASTER )
INT_ ( KEY_1 ) PRIMARY_KEY AUTO_INCREMENT
STRING_ ( DATA, 20 ) PRIMARY_KEY
END_TABLE

TABLE_ ( SLAVE )
INT ( KEY_1 )
INT_ ( MKEY ) PRIMARY_KEY  AUTO_INCREMENT
STRING_ ( TYPE, 40 )
END_TABLE
```
