Subject: Re: Array : swapping element with a pointer
Posted by mdelfede on Sat, 10 Sep 2011 20:05:22 GMT

Maybe something added to Array class :

void Swap(int i, T*&ptr) { T *tmp = ptr; ptr = vector[i]; vector[i] = tmp; }

I'd need for ArrayMap too... I wonder if it's automatic or not, adding it to Array class.
Will try....
