sergeynikitin wrote on Sat, 24 September 2011 22:47Thanks for testing! I'll try your variant.

(BTW, what OS and version of libvlc do you use?)

I've tested your player on ubuntu 11.10 (beta, gcc 4.6). On 11.04 it links ok. Maybe gcc 4.6 is more sensitive to the order of parameters.

Unfortunately player crashes on both systems just after start (invalid memory access).
