Hello,

with grid.Clipboard() I get for free a menu that do even paste and append that instead I need to prevent. I can add a button and get the selection, but before to do it I would like to know if there is a simple way to let the user to copy via CTRL+C the selected rows without insert, append, etc. on the grid.

I want to let him just copy the content of the grid and past on an extern program (Word, Excel,...).

Thank you,

Luigi
