forlano wrote on Sun, 25 September 2011 16:05Hello,

I tried to find without success some method to export the whole content of an ArrayCtrl/GridCtrl to a qtf table. Does really is it absent some smart way? I can't believe

Luigi

It is missing because while there is a nice logical way how to do that, results usually are not very good...

In any case, the code is trivial. Well, maybe we could have it in ArrayCtrl after all. Add to RM, nice easy task...
