---

I have decided to create U++ page in facebook, with intention of sort of "blogging" new interesting features there.

<http://www.facebook.com/pages/Upp-Framework/262346610476027>

Anyway, as U++ is about programmers and all programmers seem to switch head over heels to Google+, I am now questioning whether we should rather be there (I am not going to update both

.

Any suggestions?

Mirek
