Subject: Re: a simple MDI example
Posted by o_wild on Mon, 10 Oct 2011 15:11:40 GMT

Hi,
In Fedora the Style() function is not accessible in TopWindow class, and
MaximizeBox().MinimizeBox() lose effect in child window.Sizeable() still takes effect.
By the way, installation in Fedora have a minor problem. 'make install' can not select /usr/local as
the default installation path, and --prefix=xx is not accessible, so 'theide' is copied to the directory
of the extracted source code(in my computer it is
home/<myname>/Download/upp-x11-src-3550/uppsrc).

Best regards,
o_wild
