mdelfede wrote on Fri, 14 October 2011 14:59Well, I don't see a big problem keeping both with same name, usually you don't use them together, but anyways... if you have a good suggestion for name, it's wellcome

p.s.: did you try also my Uniq package ?

Max

Hello Massimo

Perhaps AppUpdater?.

About Uniq, now I understand it. However in my case I do not know if it is better to have only one instance or as many instances as the user wants.

Please do not forget to check Protect packages changes .
