```
class MyApp : public WithMyAppLayout<TopWindow> {
    virtual bool Key(dword key, int count);
    .....
};

bool MyApp::Key(dword key, int count)
{
    if(key == K_ENTER) {
        .....
        return true; // key accepted
    }
    return TopWindow::Key(key, count);
}
```
