Hi alls,

To go on with this issue when compiling directly with MySql headers and libs not through ODBC driver, I noticed that setting the project option to Multithreading (MT), I got now only one link error :

Linking...

LINK : fatal error LNK1181: cannot open input file 'opt\mysqlclient.lib'

There were errors. (0:01.31)

I took the idea from MySql website where it is said that a multi threaded mysql client library is required.

So anybody has an idea to solve this linkage error ?

Help will be appreciated

Thanks in advance
