Thanks!

But does this apply to Windows with layouts?

I tried:

```
WithMyDialogLayout<TopWindow> w;  
CtrlLayout(w);  
w.Run();
```

It seems to work.

But I don't know if this is the right way.

EDIT:

I think I got how it works:

```
WithMyDialogLayout<TopWindow> w;  
CtrlLayoutOKCancel(w, "test");  
if(w.ExecuteOK())  
    Exclamation("Selected ok");
```

Thanks for the information guys!
