Ok, it's kind for you

If you can, this will help me to learn how works Painter ! I don't think that reflexion and shade will be good in this control, but if you think that it's better to use Painter and can do it, why not ?

I began to make the .tpp file. Not so difficult ! I'm just surprised that I cannot change the text color with the editor, but I worked around this by copying/pasting from other files...
