Subject: Re: Custom build steps upgrade (publish step)
Posted by Sender Ghost on Sun, 04 Dec 2011 00:49:26 GMT

Hello, Pavel.

After reading your discussion with Mirek, I created publish step for TheIDE, which invoked after successful linking, if exists.

Example usage for your case:

cp $(EXEPATH) $(DIR)/TEST_OUTPUT/$(EXEFILE)

In the attachment you could find the patch and changed files for TheIDE, relative to 4239 revision.

To note:
Just an idea of implementation.
