Subject: Re: sql + editstring
Posted by BioBytes on Tue, 06 Dec 2011 18:18:30 GMT

Hi alls,

I agree with Jibe. I use SqlCtrls as powerful tools to handle data from MySql or PostGreSql databases. EditString etc.. work well but it is impossible or I don't not know how to do the same with droplist .

Have an idea how to deal with that issue?

Thanks in advance

Regards
