Didier wrote on Sat, 10 December 2011 12:34Hi r1kon,

I suppose you are using mutexes to protect you're shared data ?

If not, then you have to !Oh yes!

You know that when doing multithreading you have to be very rigorous. If not it is like buying tons of lottery... you probably will win

Could you send us a simple testcase and/or samples of how do you do it?
