mirek wrote on Thu, 15 December 2011 12:09I need suggestion about U++ web framework name(s).

I think we had some nice names in recent past, like BLITZ or Rainbow or Chameleon. But I have not found anything nice for web framework (better than "W++").

Sky (to link blitz and rainbow).

But I like a name that as the taste of magic

Jumanji / http://en.wikipedia.org/wiki/Jumanji
