forlano wrote on Sun, 28 May 2006 11:33Hello,

I used the option "Import runtime translation file". the .tr file came in my .t file. But now I want generate a new empty .t file. With my surprise it is always generated with the translation of the previous .tr file.
Is there a chance to remove the previous translation and get a cleaned .t file?

Luigi

Not at the moment, known translation are always inserted. Why do not you want previous translations?
