Hello,

I have 4193-1~natty0 (upp), 4193-1~natty0 (theide-nogtk) and 4:4.5.2-1ubuntu3 (gcc) installed on Ubuntu 11.04 - the Natty Narwhal.

I cannot execute the "Hello,platform" example. The message "Invalid build method" occurs. I have read http://www.ultimatepp.org/forum/index.php?t=msg&goto=322 46&S=42fbe2fb6109ad13eefd446d54f9e59a&srch=invalid+b uild+method#msg_32246 and my GCC.bm is readable but contains 0 bytes. Here is a screenshot which may help finding the solution.

Thanks in advance!
