Hello all

I have compiled Examples/Clock. This are the required compiling time in my PC with XP:

- XP native:
-- MSC9: 1:25
-- MinGW: 1:35

- Ubuntu 11.10 virtualized
-- VirtualBox: 23:20
-- Vmware Player: 1:50

Vmware result is very good but VirtualBox is terrible. And this problem does not come from last version... so I will uninstall it.
Thank you Mirek for the advice .
