peek wrote on Thu, 23 February 2012 15:41Thank you Mirek

I will try with some INITBLOCK.

The reason of the question was that in the doc it says:

Quote:This class is indented as loop-parallelization tool. Whenever loop iterations are independent (they do not share any data)

Thank you again

Ah, sorry, I guess it would need more clarification. The real deal is that 'not share any data' is best wrt performance.
