Hello all

I have tried to reduce the problem as much as possible.

What is wrong with this code?

```
SqlId TABLE("TABLE");
SqlId FIELD("FIELD");
SqlId TEXTSEARCH("TEXTSEARCH");
SqlVal set(Coalesce(FIELD, "_"));
SqlSelect select(SqlAll(), set.As(TEXTSEARCH));
select.From(TABLE);
select.OrderBy(FIELD);
```

Thank you very much in advance.
