Subject: Customising GridCtrl Search

Hi,

Just wondering if there was any provisions to customise the gridctrl.

There are 2 things I would like to do:

1. Customise the search, i.e. customise the match function.

I would like the search to only match the beginning of string. I have thought of overriding the match function, but currently it is not virtual.

2. Adding a buttons to toolbar. I have tried:

GridCtrlWidget.GetToolBar().Add(CustomCtrl);

But this doesn't display the control on the toolbar. Is there any possible way of doing this?

Thanks,
tdtran.
