Now this looks very promising. Perhaps we can dedicate next release to Mac...

Do you commit these things somewhere? Like sandbox?

Major things left to do:

- 1.better clipping esp from RichText
- 2.better font management and glyphs
- 3.mouse over images (premultiply?)
- 4.more clipboard formats
- 5.finish menus
- 6.dnd
- 7.multi-threading
- 8.printing
- 9.cleaning and some known bugs
- 10.things I forgot to mention above
- 11. Chameleon for MacOSX. We do not want to look U++ apps like winxp, right?
