Subject: Re: New graph packages
Posted by koldo on Thu, 08 Mar 2012 11:57:06 GMT

Hello Didier

I have begun clarifying (not simplifying) a little bit the mathematics and changing names of some confusing variables (like "l" and "h"). In addition now there will be different left/right and top/bottom margins.

As it is useful for you I will separate in different files, classes:
- SeriesPlot
- MarkPlot
- DrawingFunctions

And DataSource in a different package.

In addition I will try to separate in different classes:
- GridAxisDraw including grid texts
- LegendDraw for graph legends (following PlotCtrl suggestion)

This way Scatter classes will be even more flexible...
