forlano wrote on Thu, 01 June 2006 17:17OK, I've downloaded and installed 91 MB of "Visual C++ 2005 express". Now I tried to compile something but... surprise... doesn't work! The error:

```
----- CtrlLib ( GUI MSC8 BLITZ WIN32 MSC ) ( 1 / 10)

CtrlLib.icpp
C:\upp\uppsrc\Core/Core.h(240) : fatal error C1083: Cannot open include file: 'windef.h': No such

```

The file 'windef.h' is in /upp/mingw/include. It has nothing to do with the new compiler. Sure I set something wrong, but what?
I suspect the 91 MB I've downloaded are not the MSC8 required by the IDE. I add a picture of the setting.

Have you downloaded the Win32 SDK?
