[View Forum Message](#) <> [Reply to Message](#)

Added:

- PrinterJob class
- Glyph composing
- Linux printing
- Thelde:

added support for external additional file dependencies in the package organizer

added automatic dependence parsing for brc files

improved the Build and BuildProject macros to support explicit output file names

added new macro EditFile to open a different package file or a generic file in the editor

Fixed:

- RichEdit: problem with character overhang
 - X11 focus problem
 - Problem with loading .tr files from .exe dir
 - OptionTree: added missing WhenOption call
-
