Hi Aris,

Your feeding instructions at a rate well beyond my internal clock, but I'm catching up eventually. So, I have applied changes to MINGW.bm, config.h and now finally merged your GccBuilder.icpp. However, this last change caused inability to build theide:

----- ide/Builders (GUI SVO_VALUE GCC WIN32) (5 / 35)

GccBuilder.icpp

...

There were errors. (0:01.27)

How to proceed?

Best regards,

Tom
