Hii,

I have programmed to generate the report and print it, followed the example as shown in reportgen prog. I could compile and get the desired out put on linux platform. same program i tried to execute on Windows and following error occurs. Could you please tell me how to solve the issue.

erpprint.cpp

In file included from C:\MyApps\ERPPrint\erpprint.cpp:1:0:

C:\MyApps\ERPPrint\ERPPrint.h: In constructor 'ERPReportWindow::ERPReportWindow()':

C:\MyApps\ERPPrint\ERPPrint.h:27:30: error: cannot call constructor
'ERPReportWindow::ReportWindow' directly

C:\MyApps\ERPPrint\ERPPrint.h:27:30: error: for a function-style cast, remove the redundant
'::ReportWindow'

ERPPrint: 1 file(s) built in (0:01.82), 1828 msec / file, duration = 1843 msec, parallelization 0%

There were errors. (0:01.90)
