Can someone please change to date-format and date-scan string in Core.t for zhCN for me? I hate to have to manually change it every time I did an upgrade.

T_("date-format\a%2:02d/%3:02d/%1:4d")
caES("%3:02d/%2:02d/%1:4d")
csCZ("%3:02d.%2:02d.%1:04d")
deDE("%3:02d.%2:02d.%1:4d")
esES("%3:02d/%2:02d/%1:4d")
fiFI("%3:02d.%2:02d.%1:04d")
frFR("%3:02d/%2:02d/%1:04d")
huHU("%1:04d.%2:02d.%3:02d.")
itIT("%3:02d/%2:02d/%1:04d")
nlNL("%2:02d/%3:02d/%1:4d")
plPL("%3:02d.%2:02d.%1:04d")
ptBR("date-format\a%2:02d/%3:02d/%1:4d") <- this line doesn't seem to be right either even though it doesn't bother me.
roRO("%3:02d/%2:02d/%1:04d")
ruRU("%3:02d.%2:02d.%1:04d")
skSK("%3:02d.%2:02d.%1:04d")
srSP("%3:02d.%2:02d.%1:04d")
trTR("%3:02d.%2:02d.%1:04d")
zhCN("%1:04d/%2:02d/%3:02d") <- this line should be like this;
zhTW("%1:04d/%2:02d/%3:02d")

T_("date-scan\amdy")
caES("dmy")
csCZ("dmy")
deDE("dmy")
esES("dmy")
fiFI("dmy")
frFR("dmy")
huHU("ymd")
itIT("dmy")
nlNL("mdy")
plPL("dmy")
ptBR("date-scan\amdy")
roRO("dmy")
ruRU("dmy")
skSK("dmy")
srSP("dmy")
trTR("dmy")
zhCN("ymd") <---and this line
zhTW("ymd")

Thanks a million!
