Hi Mirek,

What about this: http://www.ultimatepp.org/forum/index.php?t=msg&&th=
6618&goto=35908#msg_35908 ? It seems to be serialization and SVO_VALUE related...

I thought I reported this in RM some time ago, but can't find it now :-/ Anyway, to reproduce the
issue, just try to make a clean installation of theide (i.e. without previously existing ~/.upp/theide)
and try to open package organizer.

Best regards,
Honza
