Mindtraveller wrote on Thu, 19 April 2012 04:01Mirek, what do you think about "pretty" jsonization as option in StoreAsJson()? As I mentioned before, without it, storing some types of data (i.e. program config) in JSON would be practically impossible.
Are you agree to add this option? Should I deliver a patch for it?

I agree, it is now there.

Mirek
