2. When I'm select:

```
Date sDate=GetSysDate();
Date eDate;
for(int j=0;j<=30;j++)
{
eDate=sDate+1;
sql.Execute("select count(value0) from data where data_date>='?' and data_date<'?' and
parnumber=12 and object=?", sDate, eDate, code[i]);
sql.Fetch();
sDate=sDate-1;
dayCount=sql[0];
DUMP(dayCount);
}
```

than I see that in a dumping:

parnumber=12 and object=4369

ERROR [Microsoft][SQL Server Native Client 10.0]Attribute violation with restriction on data
type(0): select count(value0) from data where data_date>='?' and data_date<'?' and

But in the SQL Management Studio this query ("select count(value0) from data where
data_date>='04/11/2012' and data_date<'04/12/2012' and parnumber=12 and object=4369") is
executed successfully

The question 2 was solved so:

```
selQuery<<"select count(value0) from data where data_date>="<<sDate<<" and
data_date<"<<eDate<<" and parnumber=12 and object="<<code[i];
sql.Execute(selQuery);
```
