but isn't it the false structure of xml should be used...?

I believe this will be a better one:

```
<vehicle>
  <car>A</car>
  <value num="1">10</value>
  <value num="2">11</value>
  <value num="3">12</value>
</vehicle>
```

OR

```
<vehicle>
  <car>A</car>
  <values>
    <a>10</a>
    <b>11</b>
    <c>12</c>
  </values>
</vehicle>
```

depending what you want to realize...

just my two cents
