Hello all,

Thank you for your reply. I experiment with that

Quote:To match them you should probably use:

```
TABLE_(matable)
  INT_   (ID) PRIMARY_KEY
  DATE   (SubscripDate)
END_TABLE
```

or:

```
TABLE_(matable)
  INT_   (ID) PRIMARY_KEY
  DATETIME (SubscripDate)
END_TABLE
```

but it seems it not works.

I use TIME_ instead of DATETIME as defined in Sqlite3Shema.h

Here is an example.
