Subject: Re: Sql .sch / Date (moved)
Posted by ratah on Fri, 18 May 2012 08:53:21 GMT

Hello all,

Thank you for your reply. I experiment with that
Quote:To match them you should probably use:

```
TABLE_(matable)
  INT_    (ID) PRIMARY_KEY
  DATE    (SubscripDate)
END_TABLE
```

or:

```
TABLE_(matable)
  INT_    (ID) PRIMARY_KEY
  DATETIME (SubscripDate)
END_TABLE
```

but it seems it not works.

I use TIME_ instead of DATETIME as defined in Sqlite3Shema.h
Here is an example.
