select PLANT.NAME from PLANT  
SQL.GetColumnInfo(0).name = NAME  
NAME.Of(PLANT) = PLANT  
NAME  
SQL[NAME] = First Plant  
SQL[0] = First Plant  
Assertion failed in C:\upp\uppsrc\Sql\Sql.cpp, line 339  
0

Sad!! Very sad!  
It turns out SQLite driver works with huge errors.

I confess, I have experimented on native sqlite3 tools.

From this it follows that it is the implementation of U++ provides such terrible mistakes?

Sad!! Very sad!

Interesting, how things are with other database engines?

Well, what is the salvation of the drowning - a handwork of drowning.....
