Something like this:

```
Image MyCtrl::CursorImage(Point p, dword keyflags)
{
    Point p1=Point(0,50);
    Point p2=Point(200,60);
    /// if (p.x>p1.x && p.x< p2.x && p.y>p1.y && p.y< p2.y)
    /// return CtrlImg::vertpos1();
    // SetMouseCursor(CtrlImg::vertpos1());
    // PromptOK("inside");

    /// else return Image::Arrow();
    return Image::Arrow();
}
```
