Hi, so long not see. I tested the latest version of this package in Windows XP, with SDL and ffmpeg the safe way. A series of errors show that some types are unrecognised. For example, ConditionVariable, Thread (MediaFile.h). Where are definitions?

BTW, I changed these lines in SDLWrapper.h

from

```
#include <SDL/SDL.h>
#include <SDL/SDL_thread.h>
#include <SDL/SDL_syswm.h>
```

to

```
#ifdef COMPILER_MSC
#include <SDL.h>
#include <SDL_thread.h>
#include <SDL_syswm.h>
#endif
#ifdef COMPILER_GCC
#include <SDL/SDL.h>
#include <SDL/SDL_thread.h>
#include <SDL/SDL_syswm.h>
#endif
#endif
```

Best regards,
Wilde
