I use TimingInspector like this:

```
TimingInspector tm;
```

```
tm.Start();  
//Do some function  
tm.End();  
Cout()<<tm.Dump()<<"\n";
```

```
tm.Start();  
//Do some function  
tm.End();  
Cout()<<tm.Dump()<<"\n";
```

```
tm.Start();  
//Do some function  
tm.End();  
Cout()<<tm.Dump()<<"\n";
```

Every time it cout the min time, max time, and the average time.

BUT NO each time ????

waht can i do ? thks!!!
