Hi all,
I'm testing Grid control and i have a little problem with SetToolBar().

I added the following functions

grid.Inserting(true);
grid.Appending(true);
grid.Removing();
grid.Editing();
grid.Accepting();
grid.Canceling();
grid.Duplicating();
grid.Searching();
grid.Moving();
grid.EvenColor().ColoringMode(2);

The problem is about my grid that show just a single column and toolbar, with so many items, go
on 3 lines... Is it possible to have 2 diffente toolbar ? maybe one on top and other on bottom ?
how ?

Thanks,
Matteo
