nlneilson wrote on Mon, 25 June 2012 09:52How do I update the latest build? There was an option in the setup about it checks each time TheIDE is run, I just used the defaults. Everytime you update your system (e.g. with sudo apt-get upgrade), new version of U++ sources will be put in /usr/share/upp. TheIDE will notify you about this by shoving an icon with little red exclamation mark on the menu bar (you can also check manually in Setup > Check for updates ...), and if you click on it, you can sync the sources to the local copy in your home directory.
