Subject: GridCtrl WhenPaste
Posted by koldo on Mon, 02 Jul 2012 08:27:57 GMT

Hello Daniel

Now GridCtrl has WhenPasteCell that is called once per every cell of a pasted selection.

Could you add a WhenPaste called after all cells has been pasted?.

The goal of this is to have a way to do checks in all pasted data. This could be made once per pasted cell but it would not be efficient (20 x 50 = 1000 cells added => 1000 times data checked when this check could be done only once at the end)
