Thank you for the answer.

Unfortunately the error still appears in SVN5110, and revealed a new one during compilation:

```
C:\uppSVN5110\reference\SQL_Sqlite3\simple.cpp(17) : error C2039: 'LogErrors' : is not a  
member of 'Upp::Sqlite3Session'  
C:\uppSVN5110\uppsrc\plugin/sqlite3/Sqlite3.h(19) : see declaration of 'Upp::Sqlite3Session'
```

After commenting

```
sqlite3.LogErrors(true);
```

lowercase field name error still appears.

PS. In sqlite and mysql worlds there are a lot of tables with lowercase field names
