koldo wrote on Thu, 05 July 2012 08:48Hello Navi

Packages are updated now. Could you try SysInfo_demo_console and SysInfo_demo_gui to see if you get the same messages?

In addition please tell me MinGW version.

Thanks for updating the package koldo. I have tried clean compiling again with the new package but still getting those compiler messages. attached text file has the compiler messages.

My MinGW version is 4.6.2
